School: Rosebank

Date: 12 June 2026

1. Table of Contents

2. Introduction (Ancient Egypt)
3. The Nile River
4. How the Nile Helped Farmers
5. Farming Along the Nile
6. Egyptian Crops
7. Why the Nile Was Important
8. King Tutankhamun
9. Discovery of Tutankhamun's Tomb
10. Why the Tomb Remained Intact
11. Treasures Found in the Tomb
12. The Valley of the Kings
13. Why the Valley Was Created
14. Life After Death Beliefs
15. Conclusion
16. References

Introduction

Ancient Egypt was one of the world's greatest civilisations. It developed along the Nile River in north-eastern Africa more than 5 000 years ago. Egyptians built pyramids, created a writing system called hieroglyphics, and developed advanced farming methods.

The Nile River

The Nile River is the longest river in Africa. It flows through several countries and was the heart of Ancient Egyptian life.

Every year the river flooded its banks and left behind rich soil. This fertile soil helped crops grow well.

How the Nile Helped Farmers

The Nile River influenced agriculture by:

- Providing water for crops.
- Leaving fertile soil after floods.
- Allowing farmers to grow food regularly.
- Supporting villages and towns.

Without the Nile, Ancient Egypt would have been mostly desert.

In-text reference: (British Museum, 2024)

Farming Along the Nile

Egyptian farmers used simple tools and irrigation channels to move water to their fields.

They grew crops during the growing season after the annual flood.

Common farming tools included:

- Wooden ploughs
- Sickles
- Water-lifting devices

Image suggestion: Ancient Egyptian farmers.

Crops Grown in Ancient Egypt

Important crops included:

- Wheat
- Barley
- Onions
- Beans
- Lettuce
- Dates

These crops provided food and helped Egypt trade with neighbouring regions.

In-text reference: (Encyclopaedia Britannica, 2024)

Why the Nile Was Important

The Nile provided:

- Food
- Water
- Transport
- Trade routes

Many Egyptians called the Nile the "Gift of the Nile" because their civilisation depended on it.

Who Was King Tutankhamun?

King Tutankhamun, often called King Tut, became pharaoh when he was about nine years old.

He ruled Egypt during the 18th Dynasty and is one of the most famous pharaohs today.

Discovery of Tutankhamun's Tomb

In 1922, archaeologist Howard Carter discovered King Tutankhamun's tomb in the Valley of the Kings.

The discovery became one of the most important archaeological finds in history.

In-text reference: (The Griffith Institute, 2024)

Why Tutankhamun's Tomb Remained Intact

Tutankhamun's tomb remained mostly intact because:

- It was hidden beneath debris and rocks.
- Later tomb construction covered its entrance.
- Grave robbers could not easily find it.

As a result, thousands of treasures remained inside for over 3 000 years.

In-text reference: (Egyptian Museum, 2024)

Treasures Found in the Tomb

Archaeologists found:

- A golden mask
- Chariots
- Jewellery
- Furniture
- Weapons
- Statues

These treasures teach us about Ancient Egyptian life and beliefs.

The Valley of the Kings

The Valley of the Kings is located near the city of Luxor in Egypt. It contains many royal tombs from the New Kingdom period.

Image suggestion: Valley of the Kings landscape.

Why Was the Valley of the Kings Created?

The Valley of the Kings was created because:

- Pyramids attracted thieves.
- Hidden tombs offered better protection.
- The desert cliffs were easier to guard.
- Pharaohs wanted safer burial places.

In-text reference: (UNESCO, 2024)

Egyptian Beliefs About the Afterlife

Ancient Egyptians believed that life continued after death.

They buried pharaohs with:

- Food
- Clothing
- Jewellery
- Furniture

They believed these items would be useful in the next life.

Conclusion

Ancient Egypt became successful because of the Nile River. The river supported farming and allowed people to thrive.

The discovery of Tutankhamun's tomb helped us learn about Ancient Egyptian culture, while the Valley of the Kings shows how Egyptians tried to protect their rulers after death.

Ancient Egypt remains one of Africa's greatest civilisations.
